Presents:

The Mystery of the Trinity

The creative process in Man and the Universe

The Trinity is the Basis of all the great religions of the world because it represents creation as both an initial and ongoing process. From the teachings of Lao Tzu up through and including the Common Era it has been the foundation of spiritual beliefs, yet this process is still not understood. We will examine it from many different perspectives because if it is in fact representative of Universal Truth, than by the Law of Correspondences we should be able to understand and see it in everything we perceive

You will learn about:

The Three Aspects of the Divine Trinity

How these Aspects interact in the Creative Process

How they are represented in the Religious teachings of the world

How they Express themselves in Man and his activities

How we can learn to look for them in everything we see

An understanding of this Basic tenet of the systems of thought and belief in the world will show us that we share more that what separates us. This Idea is at the core of Christianity and is referred to as the Father the Son and the Holy Spirit but its origins are so far back in antiquity that we cannot ascertain them. The process is divine and it is repeated in everything that God, Nature, and Man creates or comprehends. Please join us for this intriguing conversation.

And The Metaphysical Research Society
Present:

Metaphysics 101 A Full Course of Esoteric Studies

Douglas Fisichella will take you through the mysteries of the Esoteric Sciences in a way that will clarify your understanding of these abstract principles. Through the Labyrinth of different systems of thought and faith there runs "Ariadne's golden thread". This is the Ageless Wisdom at the core of the religious teachings of the world and it holds the key to understanding the interdependence and interrelation of these supposedly separate concepts.

These discussions will focus on Esoteric Principles such as:

An Introduction to The Ageless Wisdom and the Ancient Mystery Schools

The Evolution of Consciousness — Physical, Psychic, and Spiritual

The Law of Periodicity — Reincarnation and Karma

The Anatomy of Consciousness — The Constitution of the Human Being

The Fifth Kingdom In Nature — The Initiations of the Human Consciousness

The Seven Rays — Esoteric Psychology

The Trinity — Its Expression through the lower kingdoms as well as Humanity

The Seven Planes of Manifestation — There is more to the world than we see...

The Christ Epoch — The Symbolism of the New Testament seen Esoterically

Please join us for these presentations and discussions of who we are, and why we do the things we do. "The unexamined life is not worth living". (Plato)
